Data Sharing

Granular data sharing-This enables district/schools to control what data is shared with applications. Rules can be created so only specific schools, teachers, sections or even students are shared:

The screenshot shows a web interface for configuring data sharing rules. At the top, there are navigation tabs: Overview, Data Validation, Data Sharing (selected), Instant Login, and Licenses. Below the tabs, the heading is "Sharing by Rules" with a "Change" link. The main content area is titled "Current sharing rules for Achieve3000" and includes an "Edit Sharing Rules" button. The interface lists five rules, each with a description of the criteria and the number of sections affected:

- Sections where:** Teacher SIS ID equals any of: 00005788, 00037719, 00048825. 23 sections.
