

WEBVTT

1

00:01:34.380 --> 00:01:46.410

Stephen.Bowen: Well, good morning to all of you. Glad you're up this morning. I know many of you dressed up and done your hair and makeup and are sitting in your business attire, not

2

00:01:47.430 --> 00:01:49.650

Stephen.Bowen: at eight o'clock or seven o'clock in the morning.

3

00:01:52.140 --> 00:02:00.120

Stephen.Bowen: What am I going to talk about in data quality. This is the group that understands data quality, but I was told I need to talk about it. So I'm going to talk about it.

4

00:02:02.070 --> 00:02:11.940

Stephen.Bowen: Probably won't be for all of you old players probably won't be a lot of new stuff for you, but some things to consider. I want to do a little

5

00:02:12.510 --> 00:02:22.770

Stephen.Bowen: Kind of interaction in the beginning. And I'm Katie. I'm not sure whether they can just unmute and respond or if we want to throw it in the chat. But I want to start out with a question.

6

00:02:23.820 --> 00:02:32.910

Stephen.Bowen: Okay, what and this is for all of you in the room to start responding to, in some way or fashion. This is gonna be fun to see how this works.

7

00:02:33.240 --> 00:02:37.740

famisflorida@gmail.com: But let's go in the chat Stephen because we've got a almost 200 on the call.

8

00:02:37.830 --> 00:02:40.200

Stephen.Bowen: Oh my goodness. Yeah, go ahead. Let's do the chat.

9

00:02:41.670 --> 00:02:47.460

Stephen.Bowen: What are some of the issues that you have run into with data quality.

10

00:02:51.720 --> 00:02:55.230

Stephen.Bowen: When you think of your own data. Oh incorrect birth date.

11

00:02:56.400 --> 00:03:00.090

Stephen.Bowen: Poor data in the hook for data. Yeah, I'm new.

12

00:03:01.320 --> 00:03:10.110

Stephen.Bowen: School training duplicates. Ah, careless entry bad ese who VSE day to day. Okay.

13

00:03:11.250 --> 00:03:21.150

Stephen.Bowen: I'm gonna talk about fly be definitely poor everybody's talking about poor day training. When we say training without train okay training for staff. Okay.

14

00:03:23.700 --> 00:03:34.410

Stephen.Bowen: I'm too new. When you're going to find out. Let me tell you a lot of bad data, lack of love. I love what Angela says lack of ownership of the data that's a big deal.

15

00:03:35.760 --> 00:03:41.550

Stephen.Bowen: Wrong matrix. Matrix ease. Yeah, that's it. Yes, he is shoe dates of birth.

16

00:03:42.810 --> 00:03:46.830

Stephen.Bowen: You know, read manuals. Do they even though manuals exist.

17

00:03:48.330 --> 00:03:53.670

Stephen.Bowen: hyphenated names. And how about putting them people's nicknames. I love when they do that.

18

00:03:55.680 --> 00:04:02.160

Stephen.Bowen: Final finding that wasn't nice. Finding the only resource document the backup guidelines.

19

00:04:03.210 --> 00:04:10.980

Stephen.Bowen: A duplicate IDs, lack of data governance. Yeah, you got to work that out in your district definitely old beliefs.

20

00:04:12.180 --> 00:04:15.000

Stephen.Bowen: old beliefs and training not moving forward.

21

00:04:17.700 --> 00:04:21.120

Stephen.Bowen: People ask the year later. Why wasn't this reported

22

00:04:23.400 --> 00:04:24.720

Stephen.Bowen: Yeah, you get those calls

23

00:04:25.740 --> 00:04:27.780

Stephen.Bowen: Shorten window for corrections.

24

00:04:29.250 --> 00:04:35.640

Stephen.Bowen: Bad data. We're all definitely data governance new staff. Yeah, yeah, I agree with the old beliefs.

25

00:04:37.260 --> 00:04:48.330

Stephen.Bowen: Not revealing their reports. That's a big deal. Catherine and we'll talk a little bit about that today. Yeah, transportation in all caps with exclamation points.

26

00:04:50.520 --> 00:04:52.800

Stephen.Bowen: Do a backup to the edits.

27

00:04:54.060 --> 00:05:05.370

Stephen.Bowen: Okay, yeah. And those are all those are all the kind of things we in the MRIs world as the ones that have been told, we're responsible for the data we run into

28

00:05:06.240 --> 00:05:19.620

Stephen.Bowen: And so hopefully this is just going to be a general talk. I'm gonna try and get you out of here, little early so you can go get your eggs and bacon and pick up the the breakfast that famous has provided for you.

29

00:05:21.720 --> 00:05:34.740

Stephen.Bowen: One thing I've been doing with I probably the last year or so is I have decided that I really need to get in front of program people

30

00:05:35.940 --> 00:05:42.480

Stephen.Bowen: You know you guys and I and the database staff. We talk all the time we have famous every year.

31

00:05:42.930 --> 00:05:54.900

Stephen.Bowen: Um, you know, when I was amyas director, I had all of my other amyas people that helped me and talk me through stuff where we stay on top of this stuff so much

32

00:05:55.650 --> 00:06:09.450

Stephen.Bowen: But what I was finding with the program, people weren't as well versed or given the same kind of access to understand the ramifications of the data that they are responsible for

33

00:06:10.050 --> 00:06:21.540

Stephen.Bowen: And so a couple of the bureaus in the in the department have partnered with us in the data systems group and have given me access to their program directors.

34

00:06:21.900 --> 00:06:29.190

Stephen.Bowen: And I've actually been able to go around and speak on data quality data transmission data submission

35

00:06:29.910 --> 00:06:44.160

Stephen.Bowen: Those kinds of things. And I hope some of them come back and talk to you guys got told me they need to come back by you guys lunch DINNER DONUTS whatever they did and make you their best friend. But one of the things I always talk about when I meet with them.

36

00:06:46.320 --> 00:06:47.040

Stephen.Bowen: Is

37

00:06:50.280 --> 00:06:58.620

Stephen.Bowen: Data quality doesn't happen in a silo and and here's a phrase I use a lot data quality starts at the source, not at the center.

38

00:07:00.030 --> 00:07:02.310

Stephen.Bowen: And helping them understand

39

00:07:03.450 --> 00:07:11.790

Stephen.Bowen: Me as an MIT is person I am the sin. I am not the source. I can validate data, but I can't tell you.

40

00:07:12.210 --> 00:07:19.590

Stephen.Bowen: For the most part, if it's accurate because I don't know what the kid is doing. I don't know what the teachers doing. I don't know what the ESC people are doing.

41

00:07:20.100 --> 00:07:30.480

Stephen.Bowen: I'm not in the school in general, especially in some of our larger districts. I'm, I'm going to transmit what you give me I will validate your data.

42

00:07:30.930 --> 00:07:36.990

Stephen.Bowen: You know, I'll make sure that you're given an A, B, C, D, or F and you don't give me a G.

43

00:07:37.560 --> 00:07:45.300

Stephen.Bowen: That's the best, but if you give a kid and F and he should have got an A. I have no clue if that's true in that I can validate your data.

44

00:07:45.990 --> 00:08:01.950

Stephen.Bowen: Um, you got to make sure as the source that your data is accurate and all your data is in there and if your data needs correcting. You need to handle it. So I talked about this phrase a lot data quality starts at the source, not at the sin.

45

00:08:02.970 --> 00:08:11.880

Stephen.Bowen: Also let them know that we've got to have. And I think you guys understand that we got to figure out ways to do this better. How do we collaborate better between the program staff and the

46

00:08:12.300 --> 00:08:25.020

Stephen.Bowen: Staff and knowing that that is super essential that they can't work in a vacuum. We can't work in a vacuum that I help them understand there are a lot of reports available. You guys know when you look at the report for

47

00:08:26.130 --> 00:08:33.360

Stephen.Bowen: Request. There's a gazillion reports and so many times I know I just asked for all those reports.

48

00:08:33.870 --> 00:08:40.200

Stephen.Bowen: I'm not even talking about i'd look. Of course, I looked at all of those reports, because I asked for them every single report, I asked for.

49

00:08:40.560 --> 00:08:48.570

Stephen.Bowen: I did it. I wasn't just selecting all so that I could get the reports out of there. You know, I'm conscientious just like every one of you.

50

00:08:49.050 --> 00:09:00.690

Stephen.Bowen: And so, but there are many reports and really, they need to be shared with these program people and I talked to them about some very specific reports they needed to ask for. But even if they don't ask for

51

00:09:01.860 --> 00:09:04.050

Stephen.Bowen: Get it to him and document. She got it to him.

52

00:09:05.670 --> 00:09:20.670

Stephen.Bowen: I talked about a lot about state reporting is for you. Some of you guys I saw Matt, welcome you. If you're new to the world you are an exciting world right now you're going to learn things about school districts and schools that a lot of people never get to see

53

00:09:21.900 --> 00:09:32.190

Stephen.Bowen: The exposure we get as them is people is incredible. We were probably one of the few places in an entire school district that gets to see how everything works.

54

00:09:32.760 --> 00:09:44.070

Stephen.Bowen: And I hope we get more and more valued as time goes on, but you know I gotta let them know state process and we have state processing windows. You guys are super familiar with this, you know,

55

00:09:44.520 --> 00:09:54.360

Stephen.Bowen: You know, most are specially two and three have a survey week at that last day we taken account and then probably the next Monday we start processing the data.

56

00:09:55.050 --> 00:10:02.220

Stephen.Bowen: And that's when you send me stuff and we will send to the partner and stuff you don't send me anything except bad emails and pick on me.

57

00:10:02.520 --> 00:10:15.150

Stephen.Bowen: But, you know, you send your files we give you edit reports validation reports, blah, blah, blah. And we do a back and forth. And we have an amount of time called the state processing window.

58

00:10:16.620 --> 00:10:23.850

Stephen.Bowen: That we can do that now the end of the state processing window. This little date and read, we kind of stopped for a moment.

59

00:10:24.870 --> 00:10:32.220

Stephen.Bowen: And we have to do some things on the back end, we have to take care of some cleanup some also respond to some requests from

60

00:10:32.640 --> 00:10:58.410

Stephen.Bowen: People around the department that need stuff and then we start back up and we give you a final amendment date for that particular survey that final amendment date is a hard stop. I mean, it is a hard stop once that date comes. There's nothing I can do, or my staff can do to reopen a survey.

61

00:10:59.880 --> 00:11:05.220

Stephen.Bowen: If it was in order for a survey to be reopen it has to come from the Commissioner.

62

00:11:05.910 --> 00:11:15.150

Stephen.Bowen: And that request for reopen is going to have to come from a superintendent to the Commissioner, you can't ask me to do it. You can't ask me to go talk to him for you.

63

00:11:15.810 --> 00:11:23.370

Stephen.Bowen: Because I'm not gonna do that. And so superintendents gotta say, Commissioner, I needed open for whatever these reasons, then they make the decision.

64

00:11:23.700 --> 00:11:33.900

Stephen.Bowen: And if it's open. I do whatever I need to do to help if they say it can't be open. I've got to move on. But those hard stops are enroll.

65

00:11:34.620 --> 00:11:42.240

Stephen.Bowen: And in statute and they can't be changed without commission will improve without Commissioner approval and but these

66

00:11:43.230 --> 00:11:57.150

Stephen.Bowen: In the processing dates are incredibly critical dates. And why is the end of processing so critical. Not the end for the final amendment, just the end of that initial state processing window.

67

00:11:57.540 --> 00:12:06.120

Stephen.Bowen: Number one, at the end of state processing when the weekend a bunch of requests from all over the Department for ad hoc ad hoc reports.

68

00:12:06.600 --> 00:12:11.220

Stephen.Bowen: Give me the account for this. Give me the account for that. Tell me where they stand for this thing.

69

00:12:11.520 --> 00:12:18.840

Stephen.Bowen: What is the data looking like and they use that because they they want to assume that you've done all your corrections and you're done.

70

00:12:19.080 --> 00:12:22.830

Stephen.Bowen: But they wanted, they just start asking for things to send to the legislature.

71

00:12:23.130 --> 00:12:33.780

Stephen.Bowen: To send the state board to send to all these concerns that are reading our data manual know when that reporting process and it and they want to start getting information about your district.

72

00:12:34.470 --> 00:12:43.350

Stephen.Bowen: Next thing, the daily processing cycle ends. That's where we go to on the weekends, so you know you fix something on Monday, you gotta wait

73

00:12:44.010 --> 00:12:50.430

Stephen.Bowen: We're not going to run it till later. That's why you want to get a lot of this stuff done. Um, we started doing 70 for the

74

00:12:51.390 --> 00:13:06.930

Stephen.Bowen: FTP surveys preliminary recalibrated f t file started to be done and start looking at what kind of, you know, where's the money being shared. Those kind of things. For some surveys we pulled federal information and send it to the feds

75

00:13:07.680 --> 00:13:17.880

Stephen.Bowen: Doing that in the process in time and that means they get the files and that data is taken as final for them, even though it's blue seminary.

76

00:13:18.150 --> 00:13:28.860

Stephen.Bowen: For us, because we couldn't get them what they need it. If we wait it to the complete into the survey so that in the state processing is super critical and you really need let your program, people know

77

00:13:29.160 --> 00:13:36.840

Stephen.Bowen: That's a date they need a couple of days before that, actually, they need to be shooting for to make sure everything is correct in their program.

78

00:13:37.350 --> 00:13:41.130

Stephen.Bowen: Because you really, if you can, and I know, crazy things come up

79

00:13:41.550 --> 00:13:52.740

Stephen.Bowen: If you can pull it off. Try to get everything done by that in the state processing. So you can kind of cruise a little bit because I know you got about 152 other things you should be doing.

80

00:13:53.010 --> 00:14:00.540

Stephen.Bowen: And with surveys looming over you. I know used to drive me crazy trying to keep pulling people that fixed up and watching these dates come by.

81

00:14:00.840 --> 00:14:06.180

Stephen.Bowen: But, you know, really start to shoot for that if you can. I know it's challenging for some of us.

82

00:14:06.510 --> 00:14:26.670

Stephen.Bowen: With the amount of information we have to move in the number of people. We have to interact with, but that that that red date for in the state processing triggers a whole lot of things that people take as here's a picture of your district. Now we're gonna move on to them.

83

00:14:27.810 --> 00:14:31.920

Stephen.Bowen: I'm moving too fast. It's a little early so data quality.

84

00:14:35.310 --> 00:14:44.130

Stephen.Bowen: I like that. Okay, so I can't really look at the chats and talk, but I see a movement. So I want to look I'm Katie, you may keep an eye on that for me.

85

00:14:46.380 --> 00:14:48.120

famisflorida@gmail.com: Just comments.

86

00:14:48.690 --> 00:14:53.790

Stephen.Bowen: What I did people do we capture the chats anywhere, do they storm we

87

00:14:54.090 --> 00:15:00.150

famisflorida@gmail.com: We do. So this whole meeting will not only be transcribed, but the chat log will be sent to us, even today, you can

88

00:15:00.480 --> 00:15:09.030

Stephen.Bowen: See that is great. Thank you so much. You're welcome. Because there are definitely things I want to take into consideration from this group and think through with this group.

89

00:15:09.480 --> 00:15:23.460

Stephen.Bowen: And I would love. We've got to get data quality, better, but I feel like this is the group that better understands what is needed because the real work on data quality happens at the district, not at the state, um,

90

00:15:24.210 --> 00:15:37.770

Stephen.Bowen: So when we talk about data quality. One of the things that you know definitely if you're new, most of you. I know. Doug definitely is has memorized this document, and I stood PK 12 database user manual

91

00:15:38.970 --> 00:15:47.970

Stephen.Bowen: If I told him I said a page done can tell you what it says. But I'm not gonna do that to him today because the seven not even 730

92

00:15:48.990 --> 00:15:59.580

Stephen.Bowen: But this day PK 12 database user manual, which you can find on I do website is a very important document and it's a document that I really think

93

00:16:00.180 --> 00:16:12.720

Stephen.Bowen: Is not just what we should know is kind of our Bible, if you will, but program. People need to understand where this is and how to use it for their program.

94

00:16:13.350 --> 00:16:19.830

Stephen.Bowen: So appendix are is a key when I've shared this with them going through the student survey checklist.

95

00:16:20.220 --> 00:16:31.380

Stephen.Bowen: Tells him about potential probably problematic data elements by the format is going to go on and why that's important. I'm going to show you the things I've shared with them about tying their data to a format.

96

00:16:32.520 --> 00:16:36.660

Stephen.Bowen: Gives them validation exception report so they started looking at what can I get

97

00:16:37.140 --> 00:16:49.860

Stephen.Bowen: And you can help them know these are the things that I can give you. Or here's the things I'm going to send you that you need to look at because these are important reports that are helpful for viewing the data. There's the link

98

00:16:51.030 --> 00:17:04.920

Stephen.Bowen: For you to a look at what I try to help the people in the programs, understand, and I think it's important for us to understand, too, is for a bunch of programs. This isn't all the programs. I just wanted to give you an example of the kind of things.

99

00:17:06.000 --> 00:17:14.100

Stephen.Bowen: When you think through what surveys are most germane to a given program that generates money.

100

00:17:15.210 --> 00:17:29.040

Stephen.Bowen: Okay, so here's an example title one part a big ticket item. Right, so maybe two, three and five inform that that title program English language learners survey three

101

00:17:30.000 --> 00:17:39.120

Stephen.Bowen: That's what inform the E LL program. And so, helping them the understanding in the course is, you know, now this is recorded, you can share it with them.

102

00:17:39.420 --> 00:17:50.520

Stephen.Bowen: But I've shared this with a lot of them anyway. But just to help understand what surveys hit some particular programs and I need to keep my eye out for and make sure that all surveys are important.

103

00:17:51.090 --> 00:17:55.530

Stephen.Bowen: Everything all being equal, but for some programs, some a little more equal than others.

104

00:17:56.520 --> 00:18:06.810

Stephen.Bowen: Because of what we do with the data in that program. So this is a great chart to kind of share if they haven't seen it. Another thing I provide is okay, here's some reminders.

105

00:18:07.200 --> 00:18:17.370

Stephen.Bowen: Based on those programs here those specific data elements they need to go back and make sure our correct date of birth came up is one of the things

106

00:18:17.790 --> 00:18:24.240

Stephen.Bowen: Earlier, date of birth is in here. If you notice, it's on almost all of them except English language learner.

107

00:18:24.780 --> 00:18:31.530

Stephen.Bowen: That's a key thing because a lot of computations that have done it the feds that we have to send a based on how old the kid is

108

00:18:32.130 --> 00:18:35.970

Stephen.Bowen: Whether he's in a bucket to get money or not in a bucket to get month

109

00:18:36.660 --> 00:18:45.390

Stephen.Bowen: So those dates have got to be correct. Of course of in addition to, if you give me around birth date and I can't match kids for affiliate ID and other things that we do.

110

00:18:46.050 --> 00:18:56.760

Stephen.Bowen: Um, but here's a nice little chart that maybe you can share or you can look at and say, Man, I need to make sure that you know specifically these kind of things are looked at

111

00:18:58.680 --> 00:19:07.560

Stephen.Bowen: So that would be great. It would be helpful. We got the same reports that are sent the program directors, so forth. Okay, so

112

00:19:08.340 --> 00:19:19.560

Stephen.Bowen: Kim. I'm going to hold that one. And when we get the transcription of the check on that because there are program groups in the department that create their own reports outside of my shop.

113

00:19:20.250 --> 00:19:25.980

Stephen.Bowen: And then they send them to the program people we've really been trying to coordinate that effort.

114

00:19:26.430 --> 00:19:36.180

Stephen.Bowen: And I think that's a great idea is that if I can start talking to somebody Bureau chiefs and say, if you're going to send data reports to a program director

115

00:19:36.630 --> 00:19:44.790

Stephen.Bowen: Give me a chance to get it or copy their MRIs person so they can work together. Because at the end of the day is the M is person.

116

00:19:45.300 --> 00:19:52.080

Stephen.Bowen: Who's gonna have to walk them through it. Let's be real. I mean, well, I'm just they're taping this I'm going to get in so much trouble.

117

00:19:52.500 --> 00:20:05.190

Stephen.Bowen: But, um, they're going to, you know, we're going to have to work with them on that not fake. And we want to because we want to get our kids, the best resources, we can get them. I love working my ESC directing my E LL director

118

00:20:06.360 --> 00:20:13.320

Stephen.Bowen: We had a lot of fun. I'm just going through the data and it helped me understand what they have to do

119

00:20:13.740 --> 00:20:21.090

Stephen.Bowen: And how this data collection, which are all just numbers and formats, how does that, how does that impact the child.

120

00:20:21.630 --> 00:20:30.660

Stephen.Bowen: And so that kind of marriage together can be very beneficial as you're going through, I must keep moving through here who I'm

121

00:20:31.530 --> 00:20:38.040

Stephen.Bowen: I'm not going too fast, that my well you got to take you can slow it down when you when you drop it down from famous website so

122

00:20:38.640 --> 00:20:53.790

Stephen.Bowen: What we go through and this is some more of those data quality things that come out of the user manual. These are in the user manual by type of program. It even gives them a nice page, other than the big pretty chart. Another way to see the same thing, of course.

123

00:20:55.020 --> 00:21:07.770

Stephen.Bowen: Here for the particular formats and your demo format and you're fed state cop indicator for that particular title program here these data elements again now.

124

00:21:09.300 --> 00:21:24.750

Stephen.Bowen: The thing that I know is super important than data quality was what you said before, a lot of issues come in the data entries on a lot of come with people, Miss. Miss keying things or those kind of things.

125

00:21:25.890 --> 00:21:33.780

Stephen.Bowen: One of the things that I had to be mindful of is based on how my students system is organized

126

00:21:34.950 --> 00:21:43.890

Stephen.Bowen: In terms of the data and the input of data. These, these data elements don't fall on a data element format.

127

00:21:44.520 --> 00:21:58.440

Stephen.Bowen: Page like you know it doesn't just drop on one data element page. They're kind of all over based on subject area not tip, not specifically always the data sending format.

128

00:21:59.160 --> 00:22:09.780

Stephen.Bowen: And so, and then had to understand who puts in certain pieces of information. So I'm talking to the title one person about the need for

129

00:22:10.080 --> 00:22:23.490

Stephen.Bowen: birth date and lunch status and grade level and my title one person says, I gotta go whatever's in the system. I don't put that in there. So that's where now I've got to have discussions with my registrar to make sure they're on board. I've got to have

130

00:22:24.600 --> 00:22:32.190

Stephen.Bowen: Conversations with my lunch that is people to make sure if I'm doing imports have they really put in their system their PCs or whatever they're using

131

00:22:32.520 --> 00:22:45.330

Stephen.Bowen: Put in the right code to transfer over into my system, are they doing double entry between them left system and my students system. And do you ever reconcile it to be sure you gave me what was right.

132

00:22:45.930 --> 00:23:00.180

Stephen.Bowen: All of those kind of conversations had to start being done because these data elements may fall under other people than the program director, but I let them look at that and I list their help.

133

00:23:00.630 --> 00:23:08.850

Stephen.Bowen: To start working with those other areas of the district or the school that is responsible, so that it's not just me chasing the data.

134

00:23:09.150 --> 00:23:24.540

Stephen.Bowen: I got some people helping that lot of times, honestly, had a little more 30 and I hadn't had a little more. And so when they talk people listen when I taught people just go back to their office. And so, you know, had to learn how to get some allies with some juice.

135

00:23:25.590 --> 00:23:43.170

Stephen.Bowen: Whoo, who am I keep me awake Y'ALL OKAY HANG IN THERE. NOW will come in for a landing in a minute. I love DQ to as fun. Okay, so this is just the same thing for Title one part. See, this is kind of information that I put in here you can see you can give us those are provided.

136

00:23:44.670 --> 00:23:51.420

Stephen.Bowen: For this kind of thing. Title three analysis redundant.

137

00:23:53.520 --> 00:23:57.450

Stephen.Bowen: I tried to fill an hour, so don't feel bad title. Title

138

00:23:59.010 --> 00:24:12.570

Stephen.Bowen: X i, x plus nine. I know that. Okay. Um, he is. He is a big one that came up here's their, their kinds of data elements to worry about. And then once I told them. Okay, here's the things you can look out in the front end.

139

00:24:13.200 --> 00:24:28.110

Stephen.Bowen: But what survey starts and we start pushing data say once I send stuff to the state stays. Come, tell me what's good and what's not, and then statesman, give me some reports. So what I also did we start the show our program people and I really

140

00:24:28.590 --> 00:24:37.110

Stephen.Bowen: Say, help them to see it just sit down with 2030 minutes with whoever is the program director and show him some specific reports.

141

00:24:37.470 --> 00:24:47.790

Stephen.Bowen: That you're going to expect them to respond to. When you get them to them. Now I'm only talking about the reports that come out of our data collection, not the reports they get from

142

00:24:48.090 --> 00:24:56.280

Stephen.Bowen: Their contacts up here in the department. These are the things that just on the processing side, we get information on we can get a lot of information.

143

00:24:56.580 --> 00:25:15.180

Stephen.Bowen: And sometimes it can seem overwhelming, but we can go in and say, okay, what particular reports are good for this person versus this person. I got to get it, and I expect the response. So here was some of the ones that I showed them FT earn type things definitely for the E LL

144

00:25:16.650 --> 00:25:27.240

Stephen.Bowen: What kind of things have been reported for E LL, because E LL is a high multiple program FP FP code. And so we definitely watch those kind of things.

145

00:25:28.530 --> 00:25:38.580

Stephen.Bowen: This is some of the ESC stuff, you get the membership numbers are. Did they really are. Is everybody really counted. I mean, EMC director things they got 1000 ESC kids.

146

00:25:39.030 --> 00:25:49.200

Stephen.Bowen: They look on here and it only totals up 850 something's not right. Could it be that the demographic got rejected you know because he got he has he can't. You got to have an equal demographic

147

00:25:49.560 --> 00:26:01.080

Stephen.Bowen: All those kind of things come into place. But you start helping them to say, well, because I see now 850 versus 1850 sounds good to me. I'm, you know,

148

00:26:01.950 --> 00:26:13.530

Stephen.Bowen: I don't know. You're supposed to have 1000 less. You tell me. And then you get this number and see is not right. Those kind of thing. Why because data quality starts at the source, not at the center.

149

00:26:14.580 --> 00:26:28.680

Stephen.Bowen: Of these kinds of reports a good to give you a breakdown in numbers by subgroups. All this stuff is available, whoo substrate survey five, you know, sorry. Five is coming up. We have a good time with that one.

150

00:26:29.760 --> 00:26:40.680

Stephen.Bowen: Comparison of VLA accounts between last year and this year. How does it look you know you are. You can actually go back before we send you those little funny emails and say your 5% out

151

00:26:41.580 --> 00:26:52.110

Stephen.Bowen: You can go back and for something like this and say, hey, I had a bunch of these last year and I don't have as many showing this year. What's up with this or good with me. It looks right. Um,

152

00:26:56.460 --> 00:26:56.790

Stephen.Bowen: Okay.

153

00:26:58.350 --> 00:27:10.020

Stephen.Bowen: So just these kind of reports and I put the F, this is the actual port number, name, I went on to put it, because I told them they needed to ask for the report number and not the report word

154

00:27:10.380 --> 00:27:22.770

Stephen.Bowen: I told him that as an M is PERSON I'LL care about words I deal with numbers and so they had to learn my language. So I gave them the little chat. You know, I gave them the Google Translate.

155

00:27:23.310 --> 00:27:30.720

Stephen.Bowen: Translate and that they could use so they could change their words in the something that makes a difference for me. I'm

156

00:27:32.880 --> 00:27:37.320

Stephen.Bowen: OK, I see that I can't answer that one on there. Good question. Um,

157

00:27:38.640 --> 00:27:52.470

Stephen.Bowen: This is all transportation, you got reports on transportation. I know you transportation people look at that. Whoa, that's a big deal. But this we can get to the transportation people I know sometimes they have a lot going on. And they're slow to respond, push it.

158

00:27:54.630 --> 00:28:01.950

Stephen.Bowen: Helpful data submission. These are just some more. Now it's just getting I'm just showing you stuff. And that's how that goes.

159

00:28:03.450 --> 00:28:07.530

Stephen.Bowen: exceptionality with age, age is good, then you're not the birth dates. Right.

160

00:28:08.760 --> 00:28:14.610

Stephen.Bowen: Those kind of things. Now coming in for lending so

161

00:28:15.960 --> 00:28:25.650

Stephen.Bowen: The link to the database manual. If you don't have the link bookmark. You probably got a bookmark. You probably got it memorized. I know you ain't print it out, please don't print it out. I'm

162

00:28:26.550 --> 00:28:42.180

Stephen.Bowen: Really understand this, the database manuals are not just for EMI s and we've got to help change the program and tell me this is not just my thing. This is what defines

163

00:28:43.470 --> 00:28:49.320

Stephen.Bowen: how data is collected and set and which will inform

164

00:28:49.950 --> 00:29:02.610

Stephen.Bowen: Their funding their reviews. How the world sees them the decisions that will be made. This is where this will help them understand how they get what they want people to know

165

00:29:03.060 --> 00:29:15.210

Stephen.Bowen: Out to the world. It's through what we do as amyas directors and them is people and the database manual defines what we do, it helps them to understand the data elements.

166

00:29:15.480 --> 00:29:20.460

Stephen.Bowen: And understand their definitions. Sometimes they make choices. And it's kind of like

167

00:29:20.850 --> 00:29:32.310

Stephen.Bowen: What I thought it should be this while the database manually tells them what it should be. We build that manual based on direction from the program people in the department.

168

00:29:33.060 --> 00:29:37.830

Stephen.Bowen: Okay, so every data element is owned by somebody in this department.

169

00:29:38.310 --> 00:29:54.030

Stephen.Bowen: And they're the ones that tell us what the choices should be how to define them so their people are telling us what they need to collect and how to lay it out for choices. So they need to see what's been decided. This helps them know

170

00:29:54.300 --> 00:29:58.050

Stephen.Bowen: What has been decided at the state for what is needed, report it to their

171

00:29:59.070 --> 00:30:09.330

Stephen.Bowen: For the, for the areas of program now. Well, this will help them bridge the M is the Program Area language barrier. Yeah.

172

00:30:10.380 --> 00:30:17.370

Stephen.Bowen: They need a literal translation help and I know you guys can do that. Also, you know, talks about all our reporting requirements.

173

00:30:18.690 --> 00:30:25.680

Stephen.Bowen: They lay out what really should be in a student system. This is how I know you. I know you're looking forward to Theresa cycles class.

174

00:30:25.950 --> 00:30:36.630

Stephen.Bowen: With the database updates, because any changes have to go into your students system for somebody to make that choice and I really would not miss her. Her session and

175

00:30:37.230 --> 00:30:43.740

Stephen.Bowen: If you happen to miss it because you know you had to be taken away in an ambulance or something because that'd be the only reason you're not there.

176

00:30:44.160 --> 00:30:55.950

Stephen.Bowen: I'm just no famous is going to upload these on the famous online.org and you'll be able to have access to these videos. That's a video I would drop down every year we do it, drop it down and keep it.

177

00:30:56.310 --> 00:31:12.330

Stephen.Bowen: And be listening and make your notes and it'll help you program areas. Understand, we've got to help them understand how important this information is in the scheme of what needs to be accomplished in our districts

178

00:31:14.430 --> 00:31:16.200

Stephen.Bowen: I probably shouldn't run so fast.

179

00:31:17.310 --> 00:31:18.120

Stephen.Bowen: Because

180

00:31:19.740 --> 00:31:30.510

Stephen.Bowen: That's it. So here's your contacts mostly ALREADY KNOW AS HE IS is the contact number of program office phone numbers there you have a ton of questions, send it to them.

181

00:31:31.380 --> 00:31:39.540

Stephen.Bowen: They're always there to help you guys always there to work with you guys, but understand data quality will become more and more important issue.

182

00:31:39.990 --> 00:31:50.460

Stephen.Bowen: As we're going for it I shared this yesterday and that the only update arm, because the data is becoming more and it's tied to more and more super high stakes things

183

00:31:51.030 --> 00:32:07.590

Stephen.Bowen: And there are more and more decisions that are having to be made and they can only make it based on the data that we receive and so it is very imperative that you help your program people

184

00:32:09.090 --> 00:32:23.700

Stephen.Bowen: Get the data in the system accurately and timely so that when you push send it has what you need in it. And then if there are some issues and there always are issues.

185

00:32:24.240 --> 00:32:31.020

Stephen.Bowen: Validation reports reject validation errors reject areas, all those kind of things. If those do happen, help them to understand

186

00:32:31.500 --> 00:32:42.630

Stephen.Bowen: Their they need to respond to help clean that data up or help you make decisions. If you're responsible for doing the data cleanup as we go through state processing.

187

00:32:43.050 --> 00:32:53.760

Stephen.Bowen: And kind of mentioned yesterday, a little bit. I'm going to be looking a lot. I'm going to take a lot more scrutiny on these validation errors and validation reports for the districts

188

00:32:54.450 --> 00:33:10.200

Stephen.Bowen: Because I want to see, are we really cleaning up the things that we're finding. Are we getting the time to do it, are we are we, is it that we're not having the resources or the support we need, and I want to really help to

189

00:33:12.870 --> 00:33:23.160

Stephen.Bowen: Help you guys to get whatever you need to make sure the job you have gets done. And because I've been tasked with making sure data quality is good.

190

00:33:23.550 --> 00:33:40.050

Stephen.Bowen: And with that, that means I want to give you support because again data quality starts at the source, not the same, maybe I can help bridge some of those connections for you and with you. Okay, so if we have any questions, I'm going to open up for that because

191

00:33:42.360 --> 00:33:56.910

famisflorida@gmail.com: Stephen. You did such a great job. A lot of the comments coming in our comments like, Hey, I'm going to share this presentation with my staff at my district, they need to put it on and sleep with it while they're sleeping listening to this, they need just ingrained in their brain.

192

00:33:57.120 --> 00:33:58.020

Stephen.Bowen: If they do.

193

00:33:58.560 --> 00:34:07.710

famisflorida@gmail.com: If the State has in their budget to make T shirts that say it starts at the source, not to send all the participants would be willing to wear those

194

00:34:10.800 --> 00:34:16.290

Stephen.Bowen: You know I'm incredibly I mean I coined that phrase, because I'm

195

00:34:17.430 --> 00:34:20.070

Stephen.Bowen: I got a deep conviction about that, um,

196

00:34:21.900 --> 00:34:27.300

Stephen.Bowen: As an M is person. Everybody looked at me, if the data was wrong.

197

00:34:28.140 --> 00:34:34.170

Stephen.Bowen: And they helped me responsible for whether the data was right or wrong, and I'm going, it ain't my data.

198

00:34:35.550 --> 00:34:36.900

famisflorida@gmail.com: Exactly.

199

00:34:37.200 --> 00:34:52.260

Stephen.Bowen: Can somebody to talk to people making a decision. And that's what I'm gonna try and do I'm going around saying, guys. You're the source. It doesn't work without you I will help you. I will work for you, but you have to tell me what's right.

200

00:34:53.880 --> 00:34:54.960

Stephen.Bowen: Yes. And it sounds like

201

00:34:55.500 --> 00:34:58.320

Stephen.Bowen: What can you delete that point and presentation that gets out

202

00:35:00.390 --> 00:35:09.270

famisflorida@gmail.com: Of the 272 participants, we have on the call it seems to be really peppered throughout all the districts where the struggle is

203

00:35:09.930 --> 00:35:22.320

famisflorida@gmail.com: centralized data ownership, where people own their data elements where they're getting supported from the top down, and then also really, it seems like there's a lack of training and

204

00:35:23.520 --> 00:35:34.590

famisflorida@gmail.com: A lot of people are saying that they're being pulled in multiple directions the data folks are being pulled all day long and then expected to hurry up, getting their office and do their data entry and

205

00:35:34.620 --> 00:35:36.240

famisflorida@gmail.com: You know, yeah.

206

00:35:36.270 --> 00:35:50.610

Stephen.Bowen: So I can understand that because, I mean, for most of y'all were like me. I was the MRIs director, I was the accountability coordinate, I was the van guy. I was the DQ to administrator, I was the SSO administrator

207

00:35:51.630 --> 00:35:56.670

Stephen.Bowen: If they had the word data or information apparently thought we should do it.

208

00:35:58.620 --> 00:36:13.440

Stephen.Bowen: Yeah, right. And so, and all that stuff moving at the same time. It's not like I can work on this before I know because it all overlaps, that's where we've got to start to have some of the conversations. And let me tell you.

209

00:36:14.580 --> 00:36:17.730

Stephen.Bowen: The way I got the attention of

210

00:36:18.750 --> 00:36:21.570

Stephen.Bowen: People is I tied it the money.

211

00:36:23.670 --> 00:36:26.910

Stephen.Bowen: Period. You don't get this day, like you, you lose money.

212

00:36:27.960 --> 00:36:28.320

Stephen.Bowen: Yes.

213

00:36:28.680 --> 00:36:29.880

famisflorida@gmail.com: Jason Smith on

214

00:36:30.900 --> 00:36:31.890

Stephen.Bowen: Your money.

215

00:36:33.120 --> 00:36:42.330

famisflorida@gmail.com: On Jason Smith on the call has a really another great shirt idea we drive the truck. We don't load it. So I really like that.

216

00:36:42.870 --> 00:36:48.300

Stephen.Bowen: I always say I'm the I'm the post office. I just deliver the mail I don't write the letter.

217

00:36:49.410 --> 00:36:56.160

famisflorida@gmail.com: Yes. So if anyone has specific questions these comments are all great. And of course we will send those over to

218

00:36:56.370 --> 00:36:56.610

Stephen.Bowen: Me.

219

00:36:56.670 --> 00:36:59.820

Stephen.Bowen: There was a question. It was some questions and suggestions earlier.

220

00:37:00.180 --> 00:37:01.020

Stephen.Bowen: But I just couldn't

221

00:37:01.080 --> 00:37:03.210

Stephen.Bowen: Grab. So that's why I wanted to do this.

222

00:37:03.600 --> 00:37:12.600

famisflorida@gmail.com: Yeah, so let me go up and we'll start pulling questions from the chat. And then if you have new questions that you didn't say anything yet, let us know.

223

00:37:13.140 --> 00:37:22.680

famisflorida@gmail.com: One question from Mary wolf says, Is it possible to have the report in a different format like at an Excel spreadsheet that would make it more efficient to comb through the data.

224

00:37:23.820 --> 00:37:24.840

Stephen.Bowen: Okay, so

225

00:37:25.950 --> 00:37:28.830

Stephen.Bowen: Thank you. And this ties back to what I've talked about yesterday.

226

00:37:30.870 --> 00:37:41.160

Stephen.Bowen: It's getting I've got to get us off the mainframe. I don't have the flexibility. I want, or I I even wanted as an M is person.

227

00:37:42.030 --> 00:37:49.020

Stephen.Bowen: Because of you know dB to and dropping it the mainframes dropping it to me in the way that it does.

228

00:37:49.440 --> 00:38:00.840

Stephen.Bowen: It's going to give me a basic text file. Now I did learn. I had to learn how to manipulate that information to put it in a more readable form.

229

00:38:01.350 --> 00:38:06.720

Stephen.Bowen: And there are some of this may be something that you guys can talk about. That's why I really love being at famous

230

00:38:07.200 --> 00:38:17.010

Stephen.Bowen: Because there are some people in these amyas groups that are just brilliant. And they have figured out ways to parse out this information.

231

00:38:17.400 --> 00:38:28.110

Stephen.Bowen: And the reformat this information and build it the way they need, as I'm trying to get us more modern so if you can kind of, you know, this is where this community.

232

00:38:28.800 --> 00:38:39.840

Stephen.Bowen: Is who who who trained me who built me who taught me what I needed to know to be successful. So utilize the people you have the word gets around who's doing what.

233

00:38:40.170 --> 00:38:48.480

Stephen.Bowen: I think we need to share what we're doing more and more because some of the districts are doing some incredible things with the information they're pulling

234

00:38:48.840 --> 00:39:08.040

Stephen.Bowen: And they're working with their vendors to make it more available to the community that's tied to that but tag into your user groups into your local get famous. I mean, this is a wealth of information. I can't, I can't jump on that bandwagon hard enough.

235

00:39:09.270 --> 00:39:24.690

famisflorida@gmail.com: Yeah, another question we have, Steven. Is there an update on the DOA to be able to start sending the FTC data via s tip. We talked about this last year with Andre but wasn't sure if there was any movement on that.

236

00:39:25.530 --> 00:39:27.990

Stephen.Bowen: Okay. Say that again. Cuz I've got a whole bunch of acronyms.

237

00:39:28.230 --> 00:39:35.070

famisflorida@gmail.com: Okay, the Department of Agriculture. So any update on getting the DOA to start sending the free and reduced lunch.

238

00:39:35.250 --> 00:39:35.760

Stephen.Bowen: Status.

239

00:39:36.000 --> 00:39:38.460

famisflorida@gmail.com: Etc data vs FTP

240

00:39:39.450 --> 00:39:43.140

famisflorida@gmail.com: Yeah. And this was brought up last year, but we weren't sure if it moved forward.

241

00:39:43.320 --> 00:39:48.090

Stephen.Bowen: Right, we were working on that. And we honestly the the pandemic.

242

00:39:49.230 --> 00:39:55.470

Stephen.Bowen: Shut. A lot of internal departmental inter agency kind of things. Now add got really hammered.

243

00:39:56.910 --> 00:40:09.720

Stephen.Bowen: You know, because they're working with the CF on that whole pandemic EDT card thing that was going on and their work they've had the long with us. I mean, thank you for all y'all did send me the data.

244

00:40:10.620 --> 00:40:24.720

Stephen.Bowen: I think they've started sending that money off the families. Um, but I haven't heard an update from Department of Children and Families yet. So I think that's kind of slowed. I think we gotta wait till that big project is done and then start back with that conversation.

245

00:40:25.440 --> 00:40:32.580

famisflorida@gmail.com: Okay. Another question we have is, is there a staff survey checklist, just like the students are a checklist.

246

00:40:32.910 --> 00:40:33.600

Stephen.Bowen: I think so.

247

00:40:33.990 --> 00:40:42.450

Stephen.Bowen: I think it is if you look in the staff, I'd have to go in there. That'd be a good question and the database update thing with with Teresa, she's

248

00:40:43.470 --> 00:40:46.440

Stephen.Bowen: Running best for staff and student updates.

249

00:40:47.340 --> 00:40:53.940

Stephen.Bowen: And for those young staff may not know his face. He's gonna announce it I Sondra bridges has officially retired.

250

00:40:54.960 --> 00:40:57.570

Stephen.Bowen: She has joined the ranks of the super happy.

251

00:40:58.740 --> 00:41:06.000

Stephen.Bowen: And so if you, you know, wish her well big hit for me, but I know it's great for her.

252

00:41:07.980 --> 00:41:13.680

famisflorida@gmail.com: Perfect. That's great. And so everybody in the chat is helping that user out by sending them the link

253

00:41:13.710 --> 00:41:15.330

Stephen.Bowen: Yes, I saw the link. Thank you.

254

00:41:16.980 --> 00:41:24.840

famisflorida@gmail.com: Yeah, great, great job. So do we know when survey five will start processing in DQ to pre flight question from Mike

255

00:41:26.340 --> 00:41:30.780

Stephen.Bowen: Yes, I'm like I said, I'm happy to do a whole nother update

256

00:41:32.130 --> 00:41:45.210

Stephen.Bowen: They are they are working hard on that. But here's we're in a weird year right now because the State rule was approved last month to make fly be the primary key.

257

00:41:46.290 --> 00:41:52.620

Stephen.Bowen: And please be sure you're in the fly. These sessions. I'm not going to go. I'm not going to deep dive on that. I don't want to steal their thunder.

258

00:41:54.600 --> 00:41:58.950

Stephen.Bowen: But when sense is now the primary key starting a

259

00:42:00.150 --> 00:42:01.170

Stephen.Bowen: I want to say.

260

00:42:02.730 --> 00:42:03.870

Stephen.Bowen: The year right

261

00:42:05.640 --> 00:42:07.020

Stephen.Bowen: Starting tomorrow.

262

00:42:08.670 --> 00:42:10.320

Stephen.Bowen: It becomes the premier key.

263

00:42:11.670 --> 00:42:22.350

Stephen.Bowen: We're, we're to where we're having the finger the workout and make it happen is survey five is Under the old rule survey one

264

00:42:23.130 --> 00:42:29.100

Stephen.Bowen: Starts the new rule. The Q tues got to figure out how to run two systems at the same time.

265

00:42:30.090 --> 00:42:49.230

Stephen.Bowen: And that's what we're trying and you know as great as it is. It wasn't that wasn't the, the initial thought it would have to do that in this major of change. And so right now my programmers are working. I mean, they're there. They've been cranking 1012 hours a day. Easy.

266

00:42:50.280 --> 00:42:59.970

Stephen.Bowen: reprogramming, not just the Q2, but the mainframe all the reports all the downstream processes. This FL ID is touched everything I have

267

00:43:00.660 --> 00:43:16.020

Stephen.Bowen: And that means, everything's got to be touched and reprogram from witness to staff and not not staff, but the student and all the hundreds of things. Thousands of things that are underlying so we're working hard. I wish I could give you an exact date.

268

00:43:17.070 --> 00:43:30.510

Stephen.Bowen: For when that can happen but I may be able to get that soon a while somebody said, I'll be available Wednesday, July 1 okay if you say so, I'll let me talk to that. Thank you. She didn't send me the email, by the way.

269

00:43:32.460 --> 00:43:40.260

Stephen.Bowen: Yeah, you were told, June 16 now that didn't happen. You knew that didn't happen. Why do you put that in there making me look bad.

270

00:43:42.780 --> 00:43:50.520

Stephen.Bowen: So we'll double check make sure I just want to make sure I've got, I've got a meeting this afternoon with my people to kind of make sure this happens.

271

00:43:51.030 --> 00:44:02.820

Stephen.Bowen: Um, because we really want to get it up that pre flight is an awesome, awesome thing. And I was so glad when we came up when they came up with that because it helped my life. Alright.

272

00:44:04.170 --> 00:44:16.170

famisflorida@gmail.com: People love it. Um, so there was. And I just want to address this question from famous here. Someone asked, why is the DQ to session at the students, staff at the same time.

273

00:44:18.390 --> 00:44:27.990

famisflorida@gmail.com: So they wanted to know why the DQ to session here at famous is being offered at the same time as a student and staff database changes.

274

00:44:28.410 --> 00:44:41.340

famisflorida@gmail.com: And I can answer that. The reason is we had some last minute agenda changes and we had to do some shuffling. Please don't be discouraged just attend one of them. This afternoon at 1240 and then just watch the other one.

275

00:44:41.340 --> 00:44:41.730

Stephen.Bowen: Quarter.

276

00:44:41.910 --> 00:44:47.880

famisflorida@gmail.com: Yes. Yeah, we're recording everything so just watch it, it'll be available asap just as quick as we get it up.

277

00:44:48.360 --> 00:44:50.670

Stephen.Bowen: And and really trust me.

278

00:44:52.950 --> 00:45:07.980

Stephen.Bowen: If you're not in the session somebody or multiple people asked what the question you had on your mind, because we're all we all have the same issue. And so, and then you can always reach out to any of my people.

279

00:45:09.000 --> 00:45:10.710

Stephen.Bowen: Please don't hesitate to do that.

280

00:45:12.570 --> 00:45:25.620

famisflorida@gmail.com: Perfect. Any other questions. I went back through the chat and tried to pick up as many as I could. Any other questions that you'd like Stephen to address when we have him. I think this might be the last session Stevens presenting on during this conference. Am I right.

281

00:45:26.100 --> 00:45:28.710

Stephen.Bowen: Yeah, yes. I mean, I didn't me. Yeah, I'm sorry.

282

00:45:30.030 --> 00:45:40.710

famisflorida@gmail.com: Oh wait. So we have another question from Aaron any news on how we can claim class minutes flush f t on courses that are have in person and half online in the

283

00:45:42.690 --> 00:45:45.840

Stephen.Bowen: Right answer. No questions from Aaron nicely. Oh.

284

00:45:47.340 --> 00:45:49.740

Stephen.Bowen: No, no. Say that I didn't see his say that

285

00:45:50.700 --> 00:46:00.330

famisflorida@gmail.com: Any news on how to claim minutes so class minutes as much f t on courses that are half in person and half online and and what he's meeting is

286

00:46:00.690 --> 00:46:01.980

Stephen.Bowen: About the blended classes.

287

00:46:02.040 --> 00:46:03.840

famisflorida@gmail.com: Yes. Yes, exactly.

288

00:46:03.900 --> 00:46:13.230

Stephen.Bowen: So we have gotten a quite a few inquiries on this. Hey, new instructional world. It's this isn't that big topic of

289

00:46:13.770 --> 00:46:25.380

Stephen.Bowen: Providing instruction to the kids within this current situation and districts given choices and people here and there and let me halfway come to school the parts Tom stay home.

290

00:46:25.680 --> 00:46:35.850

Stephen.Bowen: You know, all these different you know flip schedules and blocks get all of that we started to get these questions because it does tie into reporting and funding and those kinds of issues.

291

00:46:36.900 --> 00:46:47.070

Stephen.Bowen: We've had to move that up the food chain. And those are things that the FDA people the program people and the Commissioner in the Chancellor's

292

00:46:47.640 --> 00:46:57.240

Stephen.Bowen: They're trying to work through all of that, so that we can give you the best direction. They also know it's time sensitive, um, because scheduling.

293

00:46:57.990 --> 00:47:02.040

Stephen.Bowen: Pretty much it started and so as soon as we get that

294

00:47:02.760 --> 00:47:11.130

Stephen.Bowen: Up, you know, like, like I said, I'm gonna work on another session to have just for us privately and I want to work through famous because I think that's the best venue to do it.

295

00:47:11.610 --> 00:47:19.080

Stephen.Bowen: I'm where I'm be able to hit a lot of these finals, the legislative update some of the things that we're doing at the store locator.

296

00:47:19.440 --> 00:47:30.300

Stephen.Bowen: Some of these things about how to report some data. Those any other new changes. I want to be able to get those kind of things in that and they're working hard to get me that information, so I can get it out fast.

297

00:47:31.260 --> 00:47:38.670

famisflorida@gmail.com: And another comment on that topic is if you could also let us know if there's any new guidance on you know attendance record.

298

00:47:38.670 --> 00:47:41.130

Stephen.Bowen: Keeping attendance. Yes. Attendees is another one.

299

00:47:41.490 --> 00:47:51.900

Stephen.Bowen: And we've been, and I thank you for all the all the sent me and those average daily attendances. It was very informative for the senior staff. Thank you for taking care of that.

300

00:47:53.160 --> 00:48:09.180

famisflorida@gmail.com: Yes, and there was, and there is um comments saying like, hey, it would be really great if we could have a regular meeting while we're going through this pandemic and we're unsure about how to do things similarly to like the assessment group does meeting. So that's just a suggestion.

301

00:48:09.450 --> 00:48:10.560

Stephen.Bowen: I know I already

302

00:48:10.560 --> 00:48:11.670

Stephen.Bowen: made that suggestion.

303

00:48:12.660 --> 00:48:16.410

famisflorida@gmail.com: Let's see, Darlene humans. I think I'm saying

304

00:48:16.560 --> 00:48:18.840

Stephen.Bowen: Yes. Yeah, um,

305

00:48:19.980 --> 00:48:26.640

Stephen.Bowen: Darling. Thank you. I'm glad I got that in writing. I think that is something I think that's a great suggestion.

306

00:48:27.660 --> 00:48:36.330

Stephen.Bowen: Now I know you guys want all show up all the time. But I think more regular communication from my team would be very beneficial.

307

00:48:37.080 --> 00:48:53.910

Stephen.Bowen: And I think now, you know, we're seeing that it is extremely possible. Um, and we don't have to be perfect. We just have to be good. And so, um, thank you. I'm gonna really I'm actually going to get up and write that on my board as one of my things to do.

308

00:48:54.930 --> 00:49:01.560

famisflorida@gmail.com: Perfect, yeah. We have a lot of great suggestions coming in about possible virtual attendance codes being separated out

309

00:49:02.130 --> 00:49:14.580

famisflorida@gmail.com: Things that you know this resource here is coming up with ideas. So I will definitely you know get this chat over to SAP Stephen to that you have all of these suggestions and ideas.

310

00:49:16.050 --> 00:49:27.030

famisflorida@gmail.com: Okay, well I think everyone has done such a great job. Do you want to use the prize wheel, Stephen, or do you want to ask them a question to do the prizes.

311

00:49:27.720 --> 00:49:29.070

Stephen.Bowen: Um, can you still hear me.

312

00:49:29.580 --> 00:49:31.200

famisflorida@gmail.com: Yeah, we can hear you. Okay.

313

00:49:31.230 --> 00:49:39.000

Stephen.Bowen: Good. I'm sorry. I was writing them on board monthly am is update meeting. Um, did we get the dog. It was extra price.

314

00:49:40.440 --> 00:49:42.450

famisflorida@gmail.com: So kind. He gave us an extra point to your

315

00:49:42.720 --> 00:49:44.850

Stephen.Bowen: Eyes, will they want the prize wheel.

316

00:49:45.870 --> 00:49:48.330

famisflorida@gmail.com: You want fries meal. They don't like answering the question.

317

00:49:48.810 --> 00:49:51.510

Stephen.Bowen: Okay, let's do the prize will share my screen.

318

00:49:51.900 --> 00:49:55.830

famisflorida@gmail.com: Yeah, enter your screen all through the prize will hang on. I just need

319

00:49:57.060 --> 00:49:59.460

famisflorida@gmail.com: I just need to click to share my screen now.

320

00:50:00.300 --> 00:50:01.410

Stephen.Bowen: So me

321

00:50:01.560 --> 00:50:02.910

famisflorida@gmail.com: Where's my prize will

322

00:50:03.540 --> 00:50:05.700

Stephen.Bowen: Give you a simple question, you know.

323

00:50:05.850 --> 00:50:07.650

Stephen.Bowen: Data quality begins at the one

324

00:50:10.440 --> 00:50:14.160

famisflorida@gmail.com: All right, people are typing in know whammy. So hopefully we'll get no enemies. Are we ready for

325

00:50:14.160 --> 00:50:23.220

famisflorida@gmail.com: The price will hang on. I'm having a script error here. Let's see. I might need to refresh. Give me just a second and

326

00:50:24.570 --> 00:50:29.130

famisflorida@gmail.com: See, look at whoever said no way means Jinx does because now we have a

327

00:50:29.970 --> 00:50:32.280

Stephen.Bowen: Technical difficulties. Hang on one second.

328

00:50:33.360 --> 00:50:37.170

famisflorida@gmail.com: Come on, you can do it prize wheel. Don't be so tired on us this morning.

329

00:50:38.310 --> 00:50:45.810

famisflorida@gmail.com: It's almost ready up, I must say stop at this time. Come on, you can do it. Oh, it's thinking. All right. It's going it's going it's going

330

00:50:45.840 --> 00:50:46.290

Yes.

331

00:50:47.790 --> 00:50:58.170

Stephen.Bowen: Okay, let me tell you something. This is the coolest thing I've seen on a virtual meeting. I just got to tell you, Katie. This, this was an incredible idea.

332

00:50:59.340 --> 00:51:10.800

famisflorida@gmail.com: Well, if I'm being honest I stole it from focus at their conference, they had a random person generator. So I have to be you know I stole it from a different conference but

333

00:51:10.800 --> 00:51:11.310

Stephen.Bowen: It's a

334

00:51:11.370 --> 00:51:21.750

famisflorida@gmail.com: Long time to spend this morning. Normally, it's been quicker than that. So let's see I tapped it again. Oh, I've got sound so hopefully it's working your gums. Right. Who's it going to be

335

00:51:25.140 --> 00:51:28.500

famisflorida@gmail.com: Oh, gosh. Someone helped me

336

00:51:30.180 --> 00:51:31.950

famisflorida@gmail.com: Not. Yeah, there you go. Okay, that's price.

337

00:51:32.910 --> 00:51:34.170

Audrey Sullivan Moore: Trend. That's correct.

338

00:51:34.980 --> 00:51:35.640

famisflorida@gmail.com: Yes. No.

339

00:51:35.790 --> 00:51:40.890

famisflorida@gmail.com: Email me at famous Florida at GMAIL. COM

340

00:51:41.160 --> 00:51:42.150

Stephen.Bowen: I thought we got to

341

00:51:42.360 --> 00:51:47.310

famisflorida@gmail.com: We do, we do. I'm just letting him to know that he is going to

342

00:51:48.690 --> 00:51:57.570

famisflorida@gmail.com: Get that price. Now, the next one is also for a Bluetooth wireless speaker and let's see what we've got.

343

00:51:58.050 --> 00:51:58.830

Stephen.Bowen: A good team.

344

00:52:01.410 --> 00:52:02.040

Stephen.Bowen: Yay.

345

00:52:03.270 --> 00:52:06.420

famisflorida@gmail.com: All right, Stephen, any parting words today for our group.

346

00:52:07.050 --> 00:52:19.080

Stephen.Bowen: Thanks for getting up this early and listen to me babble. Um, I hope. Next year we get to see each other. I get so much more out of being with y'all then then y'all even know and

347

00:52:20.220 --> 00:52:30.630

Stephen.Bowen: So many of you are not just people I know you're really my friends. And so I just want you know I appreciate you and I'm going to keep I'm gonna keep fighting the battle for you up here.

348

00:52:31.620 --> 00:52:39.030

famisflorida@gmail.com: Thank you, Steven for all you do. We do know that you are a friend of MRIs and will expect the t shirt in the next year in person.

349

00:52:40.770 --> 00:52:41.280

Stephen.Bowen: All right.

350

00:52:41.880 --> 00:52:44.160

famisflorida@gmail.com: All right, bye everybody. See you at the next session.
