# Classroom Design Challenges

Increasingly complex IT environments due to number of new devices connecting to the corporate network

Struggle to provide access, equity to and engagement for students

Pressure to adopt, integrate and engage with new technology in a more complex learning environment

Pressure to scale, bring in more technology and be budget conscious.

Pressure to integrate health and safety concepts where they might not have been thought of pre-Covid.

Teams and individuals need flexible, productive, and secure options that just work

# Making the Simple, Super.

Fewer components to manage at an overall lower cost

Replaces all these components

- Document camera
- Media Switcher
- Interactive whiteboard
- Desktop computer
- Tablet device

## Additional Benefits

- Focused Training for teachers
- Untethers the teacher
- No switching between devices
- Wireless touch and inking
- Flexible classroom layouts

**ScreenBeam & Dell...a solution that you can build on.**

Reduce the time and cost of managing ScreenBeam receivers.

Multi-User, Role-Based Receiver Management

Flexible and Scalable Architecture

Improved Security and Usability

Updated User Interface

# Not the ScreenBeam you may remember....

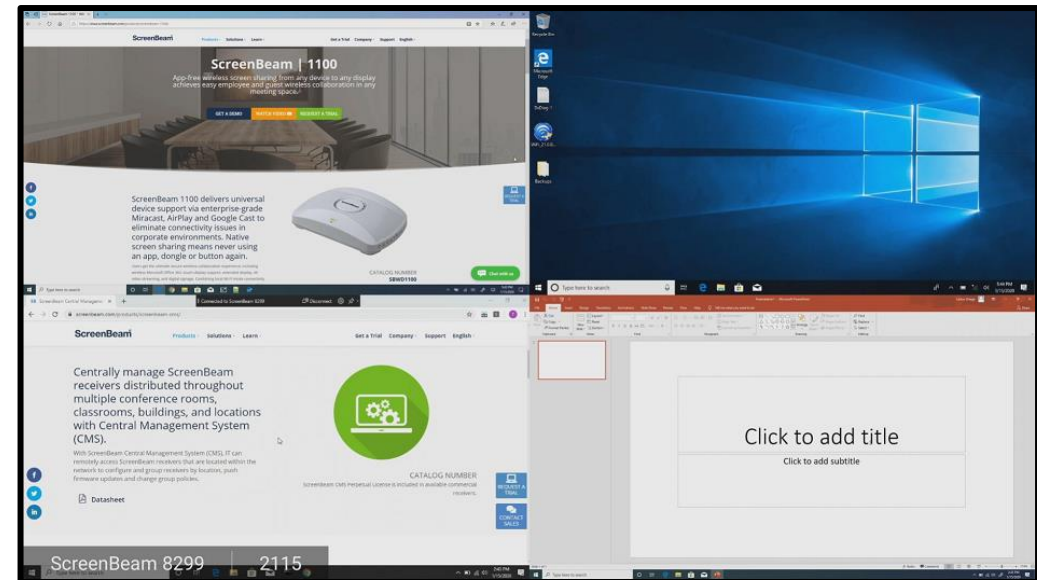

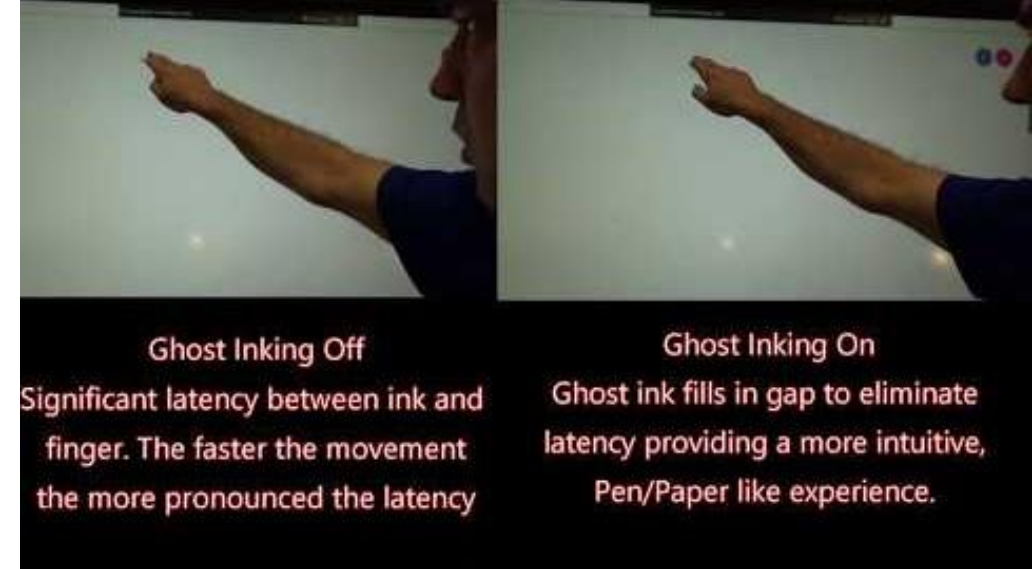

## Key Features

- ✓ Present from laptop, tablet or smartphone wirelessly
- ✓ Native screen mirroring solution; no app, no dongle
- ✓ Flexible in-room display sharing preference
- ✓ True extended desktop mode support
- ✓ Quick Switch Mode to switch between presenters without disconnecting
- ✓ Optional secured and isolated Wi-Fi hotspot
- ✓ Windows 10 native wireless touch and inking
- ✓ Integrated HTML-based digital signage player
- ✓ Orchestrate and wirelessly display up to 50 student device screens
- ✓ Flexible multi-network for staff and guest presenters
- ✓ Multi-View Mode allows up to four Windows 10 displays shared on-screen
- ✓ 4K and interactive touch panel ready

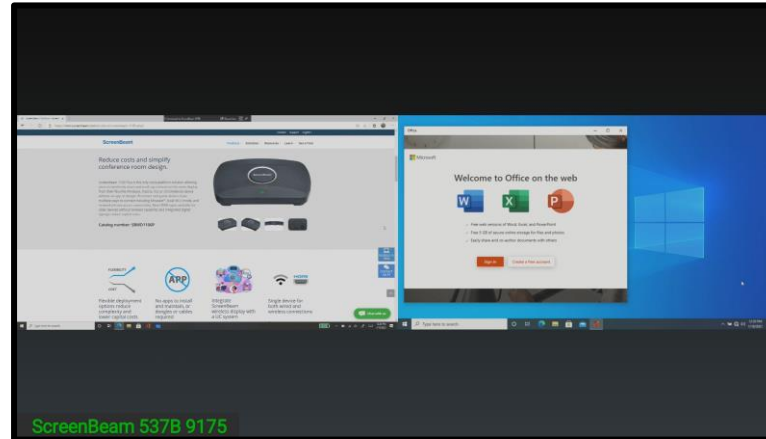

# New Features

- **Ghost Inking**
  - Eliminates hesitation to adopt wireless inking by removing distraction of ink latency
- **Digital Signage**
- **Quick Sync**
- **Multiview Mode**
  - Up to 4 Windows 10 and HDMI direct connections
- **Central Management System – Enterprise (CMSE)**
- **QR code**
- **UC Integration**

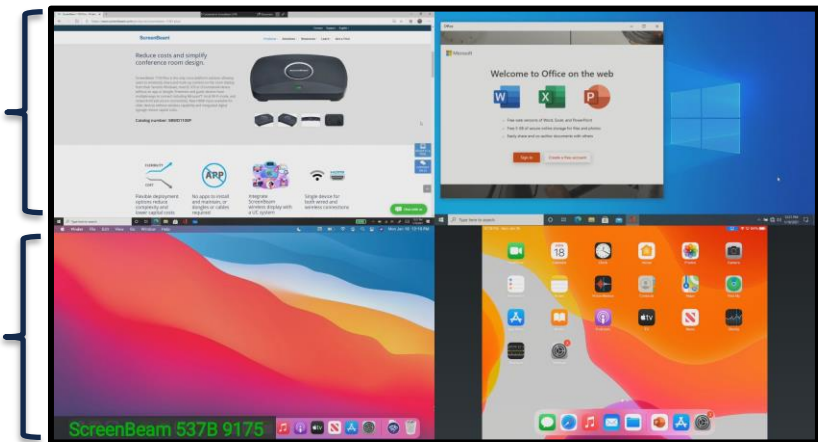

# Multiview Mode

- Up to 4 separate presenters
- Elegant animation upon connection/disconnection
- Automatic resizing
- Session PIN and receiver name presented on bottom for addition users

Windows 10  
+ Android  
Miracast

MacOS

HDMI cable

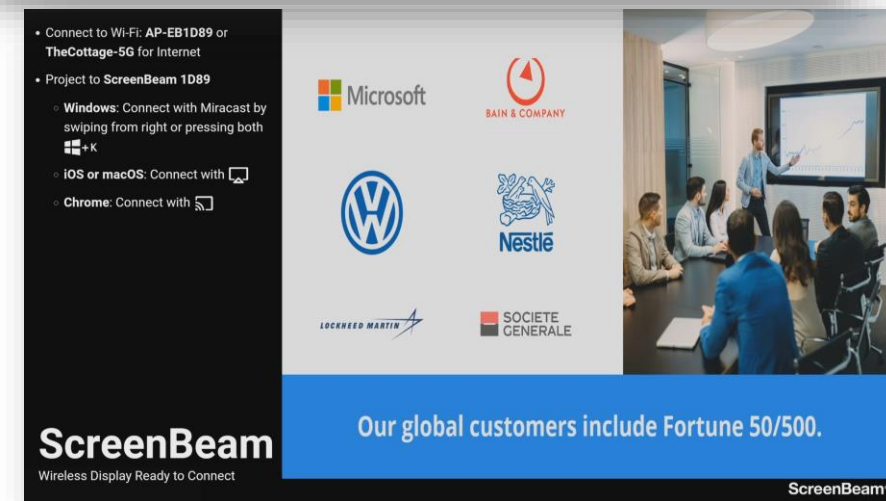

iOS

## Notes

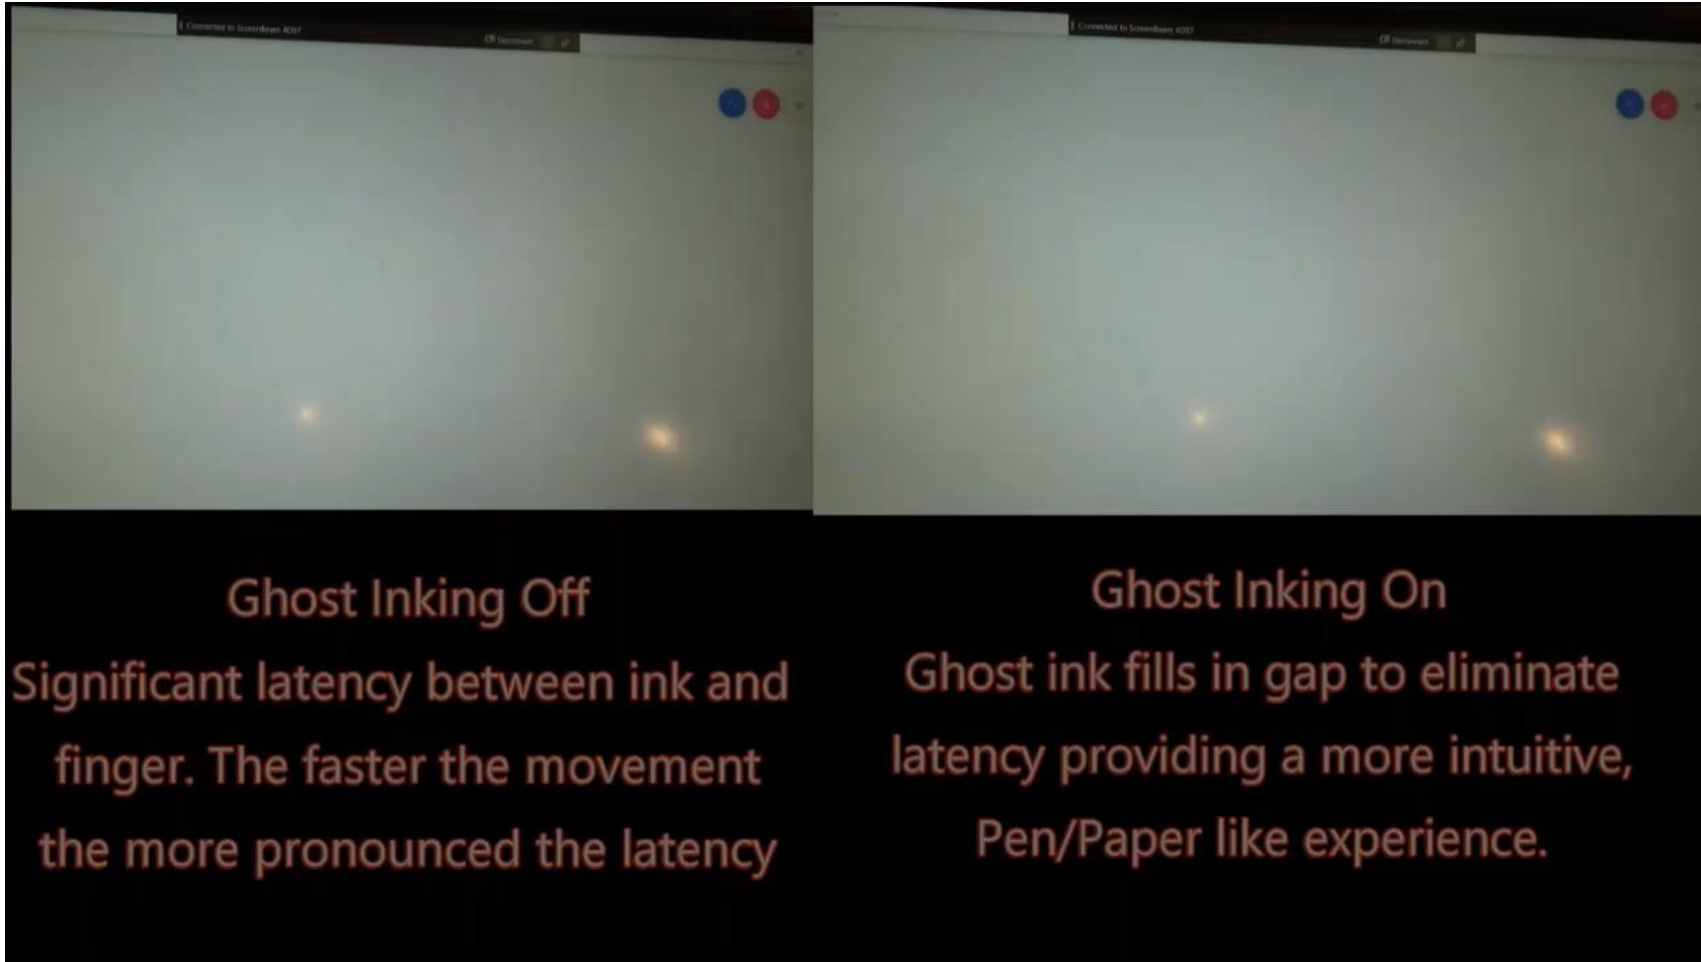

Touch/Ink disabled when 2 or more presenters sharing screen

# Digital Signage

- Leveraging displays dispersed around the office, digital signage is an effective way to communicate critical information, policies and other important information to employees.
- Digital signage can drive awareness of social distancing guidelines and best practices in conference rooms as employees enter prior to meeting.
- Partnership just announced with Carousel. Opportunity for enhanced Digital Signage if desired.

# Ghost Inking Technology

## Ghost Inking Off

Significant latency between ink and finger. The faster the movement the more pronounced the latency

## Ghost Inking On

Ghost ink fills in gap to eliminate latency providing a more intuitive, Pen/Paper like experience.

# Classroom Commander

Windows 10  
and  
Chrome

- Preview student screens
- Monitor student screens in real-time
- Untether teachers
- Create flexible classrooms
- Private messaging
- Launch browsers across devices
- Blank out student screens & lock keyboards
- Collaborate w/ wireless inking and touch
- Provide a dedicated P2P connection between each device

# Classroom Commander for Windows 10 & Chrome
