Relationship Between MIS and Accountability

Survey data is reported timely and accurately.

Survey data is compiled and initial student eligibility is determined.

Eligible students are provided back to districts for review via applications or review process.

Final calculations are released using the updated data.

Applications

- Ensures that data included in accountability calculations are up-to-date and accurate.
- Primary District Accountability Coordinators are responsible for these applications and for granting access to district/school personnel who need access.
- Fall/Winter Applications
- Spring Applications

Fall/Winter Applications

- Graduation Rate Cohort Corrections
- College and Career Acceleration
 - This is now a review process instead of an application.
 - We are reviewing the 2021-22 process and will make changes for the 2022-23 process.
- Accountability Match Process
 - Not a web application, but data used to populate spring applications.
 - Files are provided during survey 2 and survey 3 reporting.
 - This is the process that will tell districts which kids will be included in accountability.
- Roster Verification Tool (RVT)
 - The application is open twice a year, once with survey 2 rosters and once with survey 3 rosters.

Spring Applications

- School Types
- Student Data Updates
- Prior Year Assessment Matching
- Assessment Matching
 - Spring Assessments are loaded during the appeals process after the initial release of schools grades.
 - To include any additional spring assessment matches through the Assessment Matching application, an appeal must be submitted.
- RVT
 - Survey 3 rosters are available for review.
