Discussion Topics

PK12 Data Collection/Quality:

- Transition (Student) to DQ2
- Mainframe Feasibility Study
- Data Quality Reporting Refinements
- MSID 2026-27 New Districts

PK12 Data Collection 2026-27

PK12 Student Updates

PK12 Student Data to DQ2

- Transition Scheduled: **July 1.**
- DQ2 Introductory & Advanced
- Enhancing Data Collection
- Student/Staff Data Collection

PK12 Student Reporting

- Requestable Reports Transition
- Reports will be available on the mainframe until all have been transitioned to DQ2.

PK12 FTE Reporting

- Processing remains on the mainframe. Assessed as part of the Mainframe Feasibility Study.

Mainframe Feasibility Study

Program Office Interviews

- To assess existing system pain points
- To understand current processing
- To review potential change impact
- To assess technologies & platforms

Information Compilation

- Completed inventory of all available documentation, workflows, technologies, cost, statutory and legislative requirements that drive the identified processes.

Recommendations

- Based on the research conducted, recommendations were provided.

Data Quality Refinements

Data Quality Reporting

- 3 Year Trends
- Valid Values Checks
- 100% vs 0% Review
- MSID Verifications
- FLEID Verifications
- District Data Certifications

Data Quality Assessment

- Quality Criteria Review
- District Data Assessment

Data Quality Dashboards

PK12 Master School Identification 2026-27

School of Hope

A charter school operated by a hope operator which serves students from one or more persistently low-performing schools; is in the attendance zone of a persistently low-performing school or within a 5-mile radius of such school, whichever is greater; and is a Title I eligible school.

Charter School Authorizers

A charter authorizer is an organization that has the legal authority to approve, oversee, renew, or close charter schools. The authorizer ensures that charter schools meet the academic, financial, and operational standards established in their charter agreement and applicable laws, ex. Colleges & Universities.

District Level Access

Allows access to **ALL schools within the DISTRICT**, the applicable roles align with specific functionality.

School Level Access – One School

Will have access to **ONE** school within the **DISTRICT** for the module selected.

School Level Access – Multiple Schools

District Awareness: Actively working on resolution to address this scenario as we know that this limitation is a priority for districts and OSS.

The screenshot shows the FDOE Single Sign-On portal homepage. At the top left is the FDOE logo. To the right are links for Log Out and Menu, and a navigation bar with HOME, ABOUT, and SUPPORT. The main heading is "FDOE Single Sign-On". Below it, a paragraph explains that the SSO Portal provides users within Florida's educational community with a convenient way to log into multiple state resources with one account. A large graphic of an apple with "FDOE" on it and a hand pointing to it with "Single Sign-On" is centered. Below this, a button says "SELECT AN OPTION BELOW TO GET STARTED". At the bottom, there are two options: "EDUCATORS" with a photo of a family and a red arrow pointing to it, and "GUEST ACCESS" with a photo of a group of professionals.

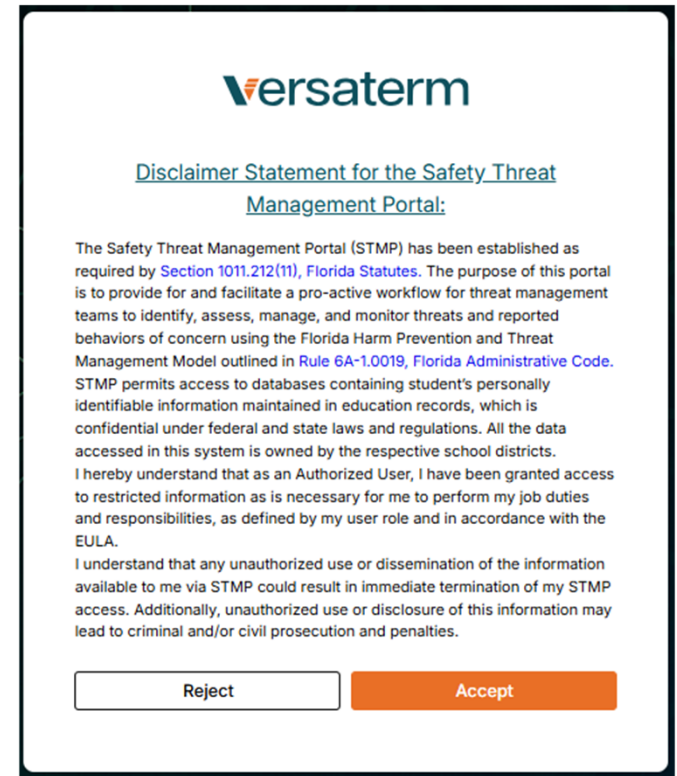

The screenshot shows the login options page of the FDOE Single Sign-On portal. At the top left is the FDOE logo. To the right is a graphic of an apple with "FDOE" on it and a hand pointing to it with "Single Sign-On". Below this, the text "Sign in with one of these accounts" is followed by a list of login options, each with a small icon and a label: "Hosted / Self-Registered login", "Florida Department of Education", "Alachua County School District", "Baker County School District", "Bradford County School District", "Brevard County School District", "Broward County School District", and "Charlotte County School District".

The screenshot shows the Florida Department of Education user portal. At the top is the logo and navigation links: Log Out, Menu, HOME, ABOUT, and SUPPORT. A 'MENU' button is on the left, with links for User Profile and Applications. The main content area is titled 'Welcome User' and contains a message: 'The resources below are available for your use based on your role and permissions. To access the resource, click the tile below:'. There are two green tiles: 'Safety and Threat Management Portal Test' and 'Florida Schools Safety Portal Test'. A red arrow points to the first tile. At the bottom is a 'GET CONNECTED' section with social media icons for Facebook, Twitter, YouTube, Instagram, and a generic share icon.

[Disclaimer Statement for the Safety Threat Management Portal:](#)

The Safety Threat Management Portal (STMP) has been established as required by [Section 1011.212\(11\), Florida Statutes](#). The purpose of this portal is to provide for and facilitate a pro-active workflow for threat management teams to identify, assess, manage, and monitor threats and reported behaviors of concern using the Florida Harm Prevention and Threat Management Model outlined in [Rule 6A-1.0019, Florida Administrative Code](#). STMP permits access to databases containing student's personally identifiable information maintained in education records, which is confidential under federal and state laws and regulations. All the data accessed in this system is owned by the respective school districts. I hereby understand that as an Authorized User, I have been granted access to restricted information as is necessary for me to perform my job duties and responsibilities, as defined by my user role and in accordance with the EULA. I understand that any unauthorized use or dissemination of the information available to me via STMP could result in immediate termination of my STMP access. Additionally, unauthorized use or disclosure of this information may lead to criminal and/or civil prosecution and penalties.

 - **07/01 (Current Year) through 06/30 (Following Year).**
 - Will need to be set to null or should not be provided in the API.
- **Race** and **Race_M** will be derived based on the individual race flags and does not need to be submitted.
 - Will need to be set to null or should not be provided in the API.
- **Multi-Student Involvement** will be automatically populated based on the student information provided in the array.

2026-27 API Documentation

Foundation API v1 OAS 3.0

SESIR

The Swagger documentation will be provided once available. There will be endpoints for searching existing SESIR incidents. There will also be endpoints available for importing one or more SESIR incidents (multiple formats accepted). The collection to be used with the Post will also be provided prior to onboarding.

GET `/sesir/v1/incidents` Search for existing incidents

Search for Existing SESIR Incidents

Overview

This endpoint allows third-party vendors to search for existing SESIR (School Environmental Safety Incident Reporting) incidents based on specified criteria. The endpoint returns detailed information about matching student incident records.

POST `/sesir/v1/incidents/import` Import one or more Incidents

Import SESIR Incidents

Overview

This endpoint allows third-party vendors to import one or more SESIR (School Environmental Safety Incident Reporting) incidents into the system. The endpoint accepts incident data in multiple formats including JSON, CSV, and plain text, making it flexible for various integration scenarios.

2026-27 System Edits & Validations

2026-27 Master Format Edits			
Column Category	Column	Edit Description (Use Reject Rule Instead?)	Example
ENROLLMENT INFORMATION	YEAR	Edit 1: Year must be correct for the submission specified by the district.	2627
		Edit 2: Year must not be blank. District Number must not be blank. (Always populate)	
		Edit 3: Format must be school year	
		Edit 4: Format must not be calendar year	
	DISTRICT	Edit 1: District Number, Current Enrollment must be numeric and in the range 01-68 or 71-75 or 80-98.	01 02 03 80
		Edit 2: District Number must not be blank. (Always populate)	
		Edit 1: School Number, Current Enrollment must be numeric in the range 0001 to 3999	0001 0002
		Edit 4: If the School Number, Current Enrollment must exist on the Master School Identification File as a valid active school (active in the current school year) in the district of enrollment.	
		Edit 5: School must not be blank. (Always populate)	0001 0002 0003 9992 9993 3450
		Edit 6: Always populate. Required Field.	

System edits are based on survey validations but tailored for this system as there is one master file layout that does not require linkage across multiple formats. OSS will also perform comprehensive secondary data quality validations and will surface issues with districts as encountered for clarification.

The validations are available in the user interface and the API. Error messages will be displayed if records don't meet the outlined requirements. The data elements are still available in the database manuals and can be referenced for valid values.

Important: The API completes pre-import validations to ensure all columns include valid values as the primary check. Once values have been validated the full edit is then completed.
