15 Max Points	FLEID Data Quality Points	2025-26 FLEID (Survey 2) Source Data Verifications (Survey vs Vault Alignment) Each district's 2526 Survey 2 records were matched against the district's records in the FLEID vault to determine record alignment and quality. The records were grouped into the following categories:	15	(- 5) up to 5 point deduction based on percent unverified
		Verified: The records in this category are survey records that either exactly matched or closely matched with the vault. Based on the percentage of verified matches, points were assigned accordingly.		
		For Review: The records in this category are survey records that near matched with the vault. Based on the percentage of matches for review , points were assigned.		
		Unverified: The records in this category were unable to be verified when matching against the vault. Based on the percentage of unverified matches, points were deducted.		
9 Max Points	Mailbox Responsiveness	2025-26 FLEID Mailbox Responsiveness Each district is responsible for working with the FLEID team to address data quality issues identified daily. As part of that process the following categories were assessed based on email notifications and communication between districts and FLEID sources. This also includes compliance with the mailbox standards (ex. exclusion of PII, including requested subject lines, etc). Based on the district emails received and data quality completed - up to 3 points were assigned for each category.	9	N/A
		Proactive Data Quality Management		
		Responsiveness & Collaboration		
		Adherence to Requirements
